## Hot water system

*A little advice;* when you arrive, make sure that the hot water programmer located in the bathroom (below the boiler) is on “AUTO” (preferred) or “ON”.

Indeed, if the programmer is on “OFF”, the hot water tank will not have heated the water ;( If this is the case, press the “ON/AUTO/OFF” button until the programmer indicates “ON”. The boiler takes about 30 minutes to heat the water. Then be sure to put the programmer back to “AUTO” (heating during the night and at the end of the afternoon) 😊
